Projects

Url Shortner - Android Application| Kotlin

- Built SecureURL+, an Android URL shortener with AI-based malicious link detection (Gemini 2.5), password protection, and link expiration.
- Implemented deep link-based auto-redirection, analytics (clicks, geo, browser stats), and history management using MVVM + Room.
- Designed a neon cyberpunk Jetpack Compose UI with Material 3, Coroutines/Flow, Retrofit, and interactive dashboards.

CropGuard AI| React,ML

- Built CropGuard AI, an intelligent cross-platform system for automatic crop disease detection, prediction, and treatment guidance using CNN-based image analysis and environmental data modelling.
- Implemented AI pipeline with 92% offline inference accuracy, real-time processing, LSTM-based outbreak forecasting, and confidence-based diagnostic reporting.
- Developed **web and mobile platforms** with real-time sync, analytics dashboard, risk mapping, alert system, and region-specific treatment recommendation engine using FastAPI backend and PostgreSQL. GitHub

Multi-Agent Task Orchestrator | Python

- Built a Multi-Agent Task Orchestrator, a full-stack AI system using LangChain and Gemini 2.5 Pro to collaboratively solve complex tasks.
- Designed a four-agent pipeline (Planner, Retriever, Summarizer, Generator) with real-time progress tracking, execution logs, and visual agent flow.
- Developed an interactive Streamlit web app supporting PDFs, URLs, AI-generated data, and outputting professional reports, articles, summaries, and presentations.

Experience

Full Stack Development

Tata steel, west bokaro

July 2025-September2025

Technical Skills

Languages: C++ • Java • JavaScript • C • Python • HTML • CSS • Kotlin

Frameworks / Tools: React • Node JS • Bootstrap • SQL • Git

Key Skills: Data Structures and algorithms • Ability to learn • Critical thinker • Team player • Fast Learner • Good Communication

Education

Usha Martin University

2022 – Present

High Secondary

2020 – 2022

Secondary

2019 – 2020
